# *Donald Greene*

was born in Youngstown, Ohio, in 1940 and has been a resident of the San Francisco Bay Area since 1946. He was educated in Bay Area public schools. His academic background includes study at the City College of San Francisco, the San Francisco Academy of Art and the California College of Arts and Crafts.

A painter of varied expressionistic skill, he has evolved a highly unique and versatile style. His abstractions are fluid, well disciplined uses of pure and muted color tones that portray a deep, empathetic expression of his views of our world.

Mr. Greene believes that the expressionist artist has a function to create simply, but with a vibrant force, a pictorial scene of man and his surroundings.
